## Ants in Your Pants?

Have you given up trying to find tough work pants that fit your figure? Well, it's time to check out **Red Ants Pants, created for women who rough it in the woods, garden, or workshop.** With reinforcements on the leg and the seat, these pants are made to last.

The front rise sits slightly below the belly button, so they're not binding around the waist, and the back rise is higher for full coverage. Made from 12-ounce cotton canvas duck, they'll soften up nicely after a few washes. The three side pockets are designed to fit a pencil, small notebook, and knife, but will also accommodate many other tools. The fit of Red Ants Pants—available in curvy or straight cut—is so functional and flattering you won't even want to take 'em off after work. And they're made in the USA to boot! Visit [www.redantspants.com](http://www.redantspants.com).
